American Ophthalmological Society

Saturday, May 22, 2027

Frederick H. Verhoeff Lecture

von Hippel-Lindau Disease: How Curious Ophthalmologic Findings Led to New Treatments for Anemia and for Cancer

William Kaelin, MD
2019 Nobel Prize Winner in Physiology or Medicine

AOS Symposium

The Power of Science:
Molecular Advances Transforming Ophthalmic Care

Emerging Therapies in Cornea & Ocular Surface Disorders - Lessons Learned from Discovery to Translational Research
Reza Dana MD, PhD

Using Genetics to Improve Glaucoma Outcomes
Janey Wiggs, MD, PhD

Advancing Diagnostics on Ocular Fluids for Uveitis and Endophthalmitis
Lucia Sobrin, MD, PhD

Innovative Strategies for Finding Treatments for the Untreatable
Leonard Levin, MD, PhD

Gene Therapies for Ultra-rare Diseases:
Have We Entered the Age of Bespoke Gene Therapies?
Mark Pennesi MD, PhD

Panel Discussion and Audience Q&A
